APPENDIX.

A. Honscholder's Census Return	[1 @ 4]
B. Proportion of Males to Females	[5]
C. Proportion of Ages in different Races	[6 @ 8]
D. Proportion of Ages of Males, Females, and Persons in different Localities	[9 @ 11]
E. Number of Families to a house and of persons to a family, to a house, and to a floor	[12]
F. Number of Assessed Houses.....	[13]
G. Number of Registered Conveyances.....	[ib.]
H. Number of Licensed Spirit and Opium Shops	[14]
J. Ships and Tonnage—Arrived and Departed	[15 & 16]
K. Correspondence relative to the Census Act	[17 @ 26]

CENSUS.

CENSUS
OF THE
ISLAND OF BOMBAY,
ON 2ND FEBRUARY 1864.

WHEN the the Island of Bombay came into the possession of Great Britain in the year 1664, in fulfilment of the treaty with Portugal, the population was estimated at ten thousand persons, and a large portion of these dwelt in the Northern part of the island at Mahim, which was then of much greater comparative importance than it is now.

2. In the course of ten or fifteen years the inhabitants had increased greatly in number, and they amounted, according to Fryer, to sixty thousand, being “a mixture of most of the neighbouring countries—most of them fugitives and vagabonds, no account being taken of them (*i. e.* such not being called to account); others perhaps invited hither—and of them a great number—by the liberty granted them in several religions.” At that time the town was a “full mile in length, the houses low, and thatched with *oleas* of the cocoa trees; all but a few the Portugals left, and some few the Company have built; the Custom House and Warehouses are tiled or plastered, and instead of *glass*, use panes of oister shells for their windows.”

3. A Census is mentioned as having been taken in the year 1716, giving only sixteen thousand persons, but it probably embraced only the Fort and a portion of the Island.

4. A Census, taken in the year 1814-15, of which the record is imperfect, gave 11,000 as the population of the Fort, and 221,550 as that of the whole Island, and 20,786 as the number of houses. The British, Military, Marine, and Civil were stated to be 4,300 persons, the resident Native Christians and Jews 12,300, the Moosulmans 28,000, Hindoos 103,800, and

the Parsees 18,150. The floating portion of the population was given as 60,000. This Census is quoted in Hamilton's Gazetteer.

5. In the year 1833-34 another numbering of the people was undertaken; but after it had continued nearly twelve months, the only result reported was, that during that time 117,016 adults had been counted. The Senior Magistrate of Police, under whose direction the Census was taken, added to the number of adults an equal number for the children, and reported 234,032 as the probable total population.

6. Between the years 1844 and 1848 Government had several times under consideration how to obtain an accurate return of the population, and in 1849 accepted the offer of the Superintendent of Police to furnish it. The money and establishment at the disposal of that officer were altogether inadequate, and his attempt ended in failure; the tables were however published in the *Government Gazette* of 10th January 1850. Two more attempts were made in the year 1851, but with no better success: the results of these were not printed.

7. With a view to ensure the success of the more matured arrangements that were being made for taking the number of the people, an Act was brought before the Legislative Council of India, to render it obligatory on householders to furnish the sought for information; but it was withdrawn, owing to instructions from England, which ordered that the enumeration should be postponed until 1861, when it was to be carried out in this country and in Great Britain and Ireland simultaneously. That year, however, brought disappointment again, as the enumeration was confined to British-born subjects.

8. The want of Population Returns became more and more felt as the schemes for water-supply, drainage, and gas lighting were brought forward, and especially as the Death Returns showed a rapid and large increase in the mortality, but left it doubtful how much of this was due to increase of population, how much to removeable causes of insalubrity.

9. On Sir Bartle Frere's entering on the Government of this Presidency, His Excellency caused a Census Act to be brought before the Local Legislative Council. This Act, rendering it obligatory on householders to give correctly the required information, was approved of and sanctioned by the Government of India. The educated part of the Native community warmly supported the measure, and advocated it in their various spheres of influence among their countrymen; and to increase the intelligent co-operation of the heads of the community, the Governor

government and to sanitary and social improvement. The leading members of the different sections of the community had meetings, and after having conferred together, they issued explanatory circulars in their different languages, and called on all to give their active aid to the Enumerators. Mr. Dosabhoj Framjee Kusara circulated, at his own expense, two thousand copies of a pamphlet, in which he explained the objects and uses of a Census, and the methods of taking it that have been followed in different countries.

10. Instructions having been given by the Government to the Commissioner of Police, he was left to carry out the appointed measures. He was to be allowed the aid of such Clerks as could be spared from the Government Offices for the day of the Census, and the rest of the Enumerators were to be hired for the work.

11. A few men were at first engaged to ascertain the probable number of Schedules that would be required in the various languages in use, and also to estimate how many lists would probably be filled in by the Householders, and how many would be left to the Enumerators to fill in. When this inquiry had proceeded for some days, it was found that the work was of greater magnitude than had been anticipated. The numbers engaged in this preliminary inquiry had repeatedly to be added to, and serious inconvenience was experienced in methodizing the work, from many of the streets and lanes being unnamed, and nearly all the houses being unnumbered, as the Assessment numbers are few and irregular, and they are useless for registration purposes.

12. An estimate of the number of families being obtained, Householders' Schedules were printed according to the appended Form A in English, Murathee, Goozurathee, and Hindostanee, and were ready for distribution, in accordance with the Act, four days before the date fixed for the enumeration. In the Householders' Return the name of the head of the family had to be shown, but in deference to the customs and prejudices of some sections of the people, it was not required that the females should be named, but merely that the relationship should be entered. On the eve of the intended distribution, a communication was received to the purport that the Act had been disallowed by Her Majesty's Government in England (see appended Correspondence K). The Governor of Bombay having met with cordial support from the Native commu-

nity, and having every assurance that the people were not only willing, but that the leading and educated part of them was very desirous to have a Census taken, the work was allowed to proceed without the sanction of penalties.

13. The number of Enumerators that had been in pay one, two, or three weeks, for the preliminary inquiries, and for distributing the Schedules, was 627, and for the enumeration on the night of the 1st and morning of the 2nd February 117 Clerks were lent from the Government offices. The number being found still too little, 107 additional Writers were taken into pay for that night, and on the evening of the 1st there being yet a deficiency, 70 more were obtained on urgent requisition from the Education Society's Press.

14. There were altogether 921 persons engaged in the enumeration on land; of these, 148 were employed as Superintendents of Districts, and 773 as Visitors and Enumerators. Of the whole number, 331 wrote in English, 147 in Goozurathee, 423 in Murathee, and 20 in Hindostanee. Besides these, there were other 70 Enumerators employed in the Harbour. Thus, for a registered population of 816,562, there were 843 Enumerators, or one for every 968 individuals, concerning each of whom there were seven points of information to note, after questioning and perhaps cross-questioning the unwilling and stupid, to elicit the truth. At the last Census of England and Wales, there was an Enumerator to every 642 of the population, and the Enumerator distributed, and collected, and verified all the Schedules of his own district, and was employed for a week after the Census in transcribing his work.

15. The European and Native Police helped in distributing and collecting the Schedules, and many educated Native gentlemen, both Hindoos and Parsees, went from house to house in their neighbourhoods, helping the ignorant to fill in the Returns, but there were discreditable contrasts to this among both Natives and Europeans, some of whom, taking advantage of the withdrawal of the Penal Act, obstructed the Enumerators or falsified the Returns, and thus caused inconvenience, as the information had to be obtained in such cases by indirect means. Unfortunately there was a panic among some of the poor and uneducated of the people, who, notwithstanding the attempted re-assurances of the better-informed of their countrymen, feared taxation, and some of them were found hiding their families: how many did so without being detected is unknown.

v

16. Owing to so many of the Enumerators being lent or engaged for one day only, instead of all having to perform, each in his own district, the distribution, the collecting, and the scrutiny of the Householders' lists, great trouble and delay was experienced in gathering in the Schedules and correcting them. Had it not been for the note on the back of each Return showing the number of the families in the house to whom Census papers were given, many lists would have been lost, as some houses here are inhabited by many families, as in Edinburgh and in Paris. In one instance fifty Schedules had been left in one tenement, and only twenty-six were spontaneously returned; but on making the scrutiny, the deficiency was detected through the note on the back of those received, and the remainder were recovered.

17. From the Enumerators being inexperienced, and from many of them having had no preliminary instruction, the information collected was in some points wanting in precision, especially as regards Caste, and Occupation, and Birthplace, and several instances of this will have to be mentioned. The correcting of the Householders' Returns, so far as was practicable, extended over six weeks.

18. The Policemen and Enumerators engaged in taking the Census were returned as belonging to the district or beat in which they were at work. The houseless who slept in verandahs and sheds were returned according to the street or *waree* in which they were found; these were numbered during the night, and in the morning before the time of their going to work. It is thought that many of these last escaped registration, and in their case there could of course be no such subsequent correction of the Enumerator's erroneous entries, as was practicable in the case of householders. On the Census day it was found that a family here and there had been omitted in the distribution of blank forms, and these omissions when discovered were rectified. There is much ground for believing that many persons escaped being enumerated, and that the recorded number is much below the actual amount of the population. There is no reason to suspect that double entries were made.

19. The enumeration of the Water Division or Harbour was taken by dividing it among the seventy Enumerators, who were aided by the whole of the Water Police Establishment.

20. The tabulation was performed in the Office of the Commissioner of Police.

21. **Population.**—The persons enumerated as present on the night of 1st February amounted to **816,562**, of whom **530,450** were males and **286,112** were females, being in the ratio of 185·4 males to 100 females. This disparity in the sexes is much greater than that which has hitherto always been found in the Mortuary Returns of the island. In these, the ratio in the last five published yearly reports is 125 to 100, and this disparity in them has been attributed to the larger proportion of males, that are always to be looked for, among those who leave their houses as adventurers, or in the pursuit of trade. If from the Mortuary tables of those five years the deaths in January and February only be taken, these months being in the season at which Bombay may be considered to have its largest number of temporary sojourners, and the time at which this Census was taken, there was the larger ratio of 136·76 males to 100 females. If the Harbour population, amounting to 32,582 males with but 55 females, be omitted, and the enumerated land population only be taken, the ratio to 100 is 174 males.

22. The difference of numbers in the sexes was least among the Jews, who had but 112, and next to them among the Parsees, who had 133 to 100 females, and with the exception of the few Chinese, it was greatest among the Europeans, as might be expected from a large number of them being Sailors or Soldiers. For the ratios in the different Castes and Races see appended Table B. The ages at which the males are most in excess in the Returns, are those above fourteen years, as is shown in the same table, where, taking all races, it is found from the age of 14 to the age of 44 years to be about 221, while under one month there are but 95, and from one month to two years but 101·4 males to 100 females, and between two and fourteen years there are 131·7.

23. Such excess of males over females was seen at others of the British dependencies or colonies; for instance at Queensland, in Australia the ratio was 151, in Victoria 155. At Mauritius the ratio was 189, and at Hongkong 280. Russia is, perhaps, the only European country where in the towns the males greatly exceed the females, and in that empire, taking the aggregate of all the towns, the males were in the ratio of 117, and taking St. Petersburg alone, there were reported 202 males to 100 females in the year 1851.

24. **The Ages** of the people have not been arranged according to quinquennial or even in decennial periods, as there was no reasonable hope that any near approach to accuracy had been attained on this point.

In the Mortuary registration there is some hope of obtaining an approximation to the true age, as the question is inquired into leisurely in each instance ; but knowing the hurried manner in which the information had been taken by the Enumerators in many instances, it was not considered of any use to make so minute a classification, at present, as there is in the Deaths Returns.

25. The tables have been framed according to the ages at which there is least likelihood of such error as would arise from ignorance . The age of an infant a month old leaves little room for doubt, and the age of a child of two years is within the easy recollection of the parents. The next period is that of puberty, which is, in this country, the age of marriage. Owing to the early betrothals, the husband and wife in the large majority of instances are nearly of the same age, and the physiological change that takes place in the female about the age of forty-five is a guide to the age of both.

26. Of those enumerated, there were 17,644 persons under the age of two years, and 155,928 between two and fourteen years, or altogether 172,972 under the age of puberty. Between this period and the age of forty-five there were 526,523, and above this last age 117,067. Thus the constitution of the population in Bombay resembles that of a rapidly increasing new colony, where males in the prime of life are greatly in excess : it differs widely from that of European countries. The contrast between this place and England is here shown :—

Ages.	England at Census 1861 Per cent.	Bombay at Census 1884 Per cent.
Months 0 to 23.....	5.6	2.16
Years 2 to 13.....	27.7	19.02
„ 14 to 44.....	47.5	64.48
„ 45 and over.....	19.2	14.34
	100.	100.

27. The proportions of the ages in different races is exhibited in appended Table C, and their proportions in different localities in Table D.

28. If the sexes be taken separately, the excess of males between fourteen and forty-five years is still more marked, while the proportion of females at that period of life differs less from what it is in European communities, and this probably arises from the females being less migratory.

Ages.	Bombay.		Glasgow.	
	Males.	Females.	Persons.	Ages.
Months 0 to 23	1.68	3.06	6.0	0 to 23 months.
Years 2 to 13	16.07	24.49	27.6	2 to 14 years.
„ 14 to 44	68.33	57.35	55.7	15 to 44 „
„ 45 and over ..	13.92	15.10	10.7	45 and over.
	100.0	100.0	100.0	

29. It has been thought that the death rate of some community of known elements might be usefully applied as a test of the general accuracy of the present Census, and that of Glasgow has been selected, as there is in that city a population large enough for the purpose, and one which has been rapidly increased by immigration, and also because it has a high death rate. The result of this test is in the subjoined table, wherein is seen a very near approximation of the enumerated to the estimated population :—

Glasgow.		Bombay deaths in 1863.	Bombay estimated population by Glasgow death rate.	Bombay population by enumeration 1864.	Bombay Ages.
Ages.	Death rate in 1858.				
Months 0 to 23..	20.04	5,114	25,513	17,644	0 to 23 months.
Years 2 to 14..	2.44	3,480	142,623	155,328	2 to 13 years.
„ 15 to 44..	1.28	7,317	571,640	526,523	14 to 44 „
„ 45 and over.	4.77	3,836	80,419	117,067	45 and over..
			820,195	816,562	

30. The European proportion of ages is most nearly approached by the Jewish and Parsee females, perhaps from their being more settled in residence than others.

Females.

	Jewish.	Parses.
Months 0 to 23	6·87	3·78
Years 2 to 13	31·81	27·24
„ 14 to 44	45·31	51·16
„ 45 and over	16·01	17·82
	100·0	100·0

31. In comparing the proportion that the enumerated children of both sexes under two years of age bears to the females of the procreative period of life in Bombay, with the proportion in England, a very wide difference is discovered. Among the temporary sojourners who yearly visit Bombay for trade, or to obtain work, there are many females, and it is to be looked for that those who have, or expect soon to have infants to take care of, would not leave their country homes, and that the proportion of children to women present in Bombay would thus be kept low. And this supposition is supported by finding that among the Hindoos, who are most migratory, the ratio of children under two years of age to every hundred women from the nubile age to forty-five, is but 9·8, while among the more fixed races—the Parsces, Jews, and Indo-Europeans—the ratio is from fifteen and a half to sixteen. Even the latter ratio is greatly less than that in the last Returns in England, where it is stated to be as high as forty to a hundred women. On looking back to the British population Returns of 1841, the ratio is there found to have been but twenty-two and a half, so wide have been the results of enumeration even in England. In Bombay it was found, by the present enumeration, to be 10·7 to 100 females.

32. **The Castes and Races** have been grouped in the way followed in the Mortuary Registration. Had each sub-division of Hindoo caste been shown in the tables, the office labour and expense would have been greatly increased, and without any assurance that all had in the first place been correctly noted. The apparently insignificant Lingaet and Bhatia castes are shown distinct from the others, and by the side of the Brahmuns, because these castes, along with the Jain, form the portion of the community that religiously refrains from eating flesh; and as this classification was introduced into the Mortuary Registration on scientific

grounds, it is desirable that it should be maintained in the Population Returns.

33. The Hindoos Out-of-caste are called *Untej*, and are separated from the Hindoos of caste who do not object to eat flesh, such as the Shenvee, Koonbee, Panchkulsee, Sonar, and many more. The *Untej*, or Hindoo Out-caste, are the Mhar, Purwaree or Dher, and the Chambar, Moopchee, Mhang, and Bhungee.

34. Most of the Negro Africans are Moosulman in religion, but in all other respects being very different from the other races of Mahomedans, they have been separately tabulated. The designation *Negro* has been prefixed to the term African, to distinguish them from those who are mere Colonists of Africa. The Christians have been sub-divided into those of pure Asiatic origin, those of pure European origin, and those of mixed parentage.

35. The motley concourse on the island, although it is thrown into so close a juxtaposition, is widely separated in religious and social matters; nor will its various sections even eat together. The Christians alone are free from restraint in this respect. The Moosulmans of India have retained or acquired Hindoo caste ways, and except it be the few Arabs or Persians that are to be found here, they refuse to eat with any of another religion—even with those that have in reverence the "*Kitab*" or Bible. The Parsees also are assimilated in many of their ways to the Hindoos. Among the Hindoos, each sub-division of caste is separated from every other in eating and in marrying, and has its own traditions and rules. The population comprises those of the Boodhist religion or Jain, who have no personal god, those of the Brahminical who have many gods, of the Zoroastrian who have a Duality, of the Moosulman who have one god, and those of the Jewish and the Christian faiths.

36. The relative numbers in which the various elements of the population were enumerated, were the Boodhist or Jain 8,021, or about one in every hundred; the aggregate of those of the Brahminical creed 577,947, or nearly seventy-one in every hundred, or taking these separately, the Brahmuns 30,604 in number, were three and three quarters in the hundred; the Lingaet 1,598 and Bhatia 21,771, or together nearly three in the hundred; the Out-caste Hindoos were 32,434, or about four per cent. The Moosulmans were 145,880, or nearly a sixth of the reported population; the Parsees 49,201 or six per cent.; the Christians three and three quarters per cent.; while in still smaller numbers follow the Jews

2,872, or a third per cent.; the Negro-African 2,074, or a quarter per cent., and the Chinese who were counted 358.

Present in Bombay on the Night of 1st February 1864.

Caste or Race.	Number.	Ratio.	Caste or Race.	Number.	Ratio.
Buddhist or Jain . . .	8,021	·98	Parsee	49,201	6·03
Brahmun	30,604	3·75	Jew	2,872	·35
Lingaet	1,598	·19	Native Christian	19,903	2·44
Bhatia	21,771	2·67	Indo-European	1,891	·23
Hindoo of other caste . .	491,540	60·20	European	8,415	1·03
Hindoo Out-caste	32,434	3·97	Chinese	358	·04
Moosulman	145,880	17·87			
Negro-African	2,074	·25	All Races	816,562	100

37. The registered deaths give a different ratio from what is shown of the population in this table, and although the proportions may possibly be affected by a recent very greatly increased influx of Hindoos, to meet the demand for labourers in the many extensive works that are being carried on, yet there is reason to conclude that the difference is in part due to reticence or concealment on the part of the householders. The deficiency is most marked in the Moosulmans, who from the Mortuary tables appeared to form nearly a quarter of the population, but who here bear the proportion of only 17·9 per cent.

38. **Localities and Density of the Population.**—There is not any very exact survey of Bombay in existence, but the surface of the united Islands is reckoned to be about 18·62 square miles, or a square mile to every 42,104 of the land population, were this to be equally distributed over the whole area: there is an acre to every 65·8 persons. The population is, however, very unequally distributed, and much of the land is unoccupied by buildings, being under cultivation, or laid out in salt-pans, or being hilly waste land.

39. The registration of the people was made according to the Divisions and Sections that are in use for Police purposes, and which have formed the Mortuary Registration districts during the last fifteen years. The sub-sections used by the Police, and now adopted, may be found con-

venient in the Death Registration. These sections and sub-sections may be considered as urban, suburban, and rural. Among the first is the Fort Section of the A Division, which has hitherto been isolated from the other urban portion, by its recently levelled ramparts and its esplanade, eight hundred yards wide ; its inhabitants numbered 41,713 persons. The urban sections that form what is called the Native Town, are all those of B Division and those of C Division, excepting the sub-sections Phunuswaree, Girgaon, and Khetwaree, and they returned a population of 449,891 persons. The suburban sections are Colaba, with its 19,161 inhabitants, the Esplanade with 7,869, Phunuswaree 22,529, Girgaon 21,505, Khetwaree with 29,177, Chaoputee 6,184, Kamatheepoor 81,675, and Tarwaree with 9,462 inhabitants. Mazagaon Section, with a population of 21,784, has in it a town of 10,078 inhabitants, or if the closely adjoining villages Naeghur of 3,724, and Mathurpakaree of 2,504 persons be counted with it, there will be a town population of 16,306. The rest of the island may be considered as rural, but there are many villages scattered over it, for instance the fishing villages of Seoree of 883 persons, and Wurlee of 4,375 persons, and the villages of Bhoewaree of 1,074, Matoonga with its *pakaree* of 1,625, Wudala of 1,789, Naegaon of 1,556, and Dharavee of 992 in the Seo Section ; while Mahim, at the North-west end of the Island, is another little town.

40. The density of the population in some parts of the town is very great, and in the less populous sections of the Island, the inhabitants do not benefit as they might by the greater available space, but generally cluster together in closely packed villages. Were the enumerated population, exclusive of the 32,582 in the harbour, to be equally distributed over the whole surface of the Island, each of the 783,980 persons would have seventy-three and a half square yards on which to stand. In London each person has one hundred and fourteen and a half square yards.

41. The Fort, with its high houses and narrow lanes, has the look of a greatly overcrowded town, and in parts it is in reality so ; but owing to the greater part of the buildings in its Southern sub-section being occupied as offices, shops, and warehouses, in which only the watchmen remain at night, and owing to the unbuilt ground in the Dockyard, the Arsenal, and the Green being taken into account in the measurement of the area, those present on the night of the Census in the Southern portion had two hundred and eleven and three quarter square yards, while those in the Northern subsection had but eleven and a half each.

42. The Sections which are counted as strictly urban and as forming the Native Town, may be looked at apart from the others; they cover a surface of 606·60 acres, and afford an average of only six and a half square yards to each of their 449,891 inhabitants. The maximum area in these Sections is nine and a quarter, and the minimum is the very small average area of five and four-tenths square yards; this minimum is the mean extent of surface for each of the 135,661 persons on the 152 acres of Market Section and Dongree Sub-section of the B Division. The very great density of the population of part of Mandwee Sub-section is not readily apparent, owing to the quays, which are unoccupied by dwellings, being included in the measurement of its area.

43. On searching the English Registration Returns, it is found that the most densely peopled of the localities in London have an area in square yards for each person as follows:—In Sub-district Berwick Street 11·4, in Sub-district Whitecross Street 10·8, East London 18·2, Sub-district Crippllegate 16·7, St. Mary's in St. George in the East 16·5. The mean area in Liverpool is 39·9 square yards, or taking only the portions that are built on, each person in the year 1860 had seventeen square yards: twenty years ago there was a part of that town that gave to each only six square yards.

Mean Area of standing ground available for each Person returned as present at the Census.

	Area of Section.	Mean Area for each person.		Area of Section.	Mean Area for each person.

Koombarwara	43·51	9·1			

44. The population on shore formed 101,890 families, as reckoned by the Householders' schedules that were collected. The average number of persons in a family was 7·7, but as in many households the servants were accommodated in the outhouses of the premises, and in such cases their wives and children present were always included with themselves in the masters' lists, the number of families is understated. From the same circumstances, and from hospitals, boarding-schools, prisons, and regiments being dealt with as families, the mean number composing a family is somewhat exaggerated in the tables. The principal Public Institutions now alluded to were :—In Colaba, part of an European Regiment 480 strong with followers; the Lunatic Asylum, in which there were 155 male and 39 female patients and establishment. In the Fort the European General Hospital with 103 sick and establishment. On the Esplanade two Native Infantry Regiments, one 537, the other 943 strong, with their followers. In Oomburkharee Section the County Jail with 142 Criminal and 51 Civil prisoners and its establishment. In Dhobeetulao the Indo-British School and Orphanage with 94 boys and girls. In Khetwaree the Daood Sassoon Reformatory, containing 67 boys. In Chaoputee the Free Church Native Female Orphanage and School with 50 children. In Tarwaree the Jejeebhoy Hospital with 247 male and 52 female patients and its establishment, and the Roman Catholic Orphanage with 105 boys. In Kamatheepoor Section the Benevolent Society's *Dhurmsala* with 166 male and 146 female paupers. The Education Society's School and Orphanage with 130 male and 134 female children and establishment; the House of Correction with 85 European and 115 Native prisoners and the establishment. At Mahim there was the Scottish Orphanage with 27 boys and 20 girls. The inhabited out-houses, huts, or sheds, of which the occupants were included in the Returns from the main buildings, amounted to 1,458.

45. The inhabited *houses*, exclusive of the above subsidiary buildings, were 24,206 in number; of these, 6,676 were thatched huts that were situated in the rural and suburban Sections. Of the 17,530 tiled houses, sixty-two per cent. had upper stories and twenty-two per cent. had more than one upper floor. It is, of course, in the urban Sections where the proportion of high houses is greatest, and there are many in these sections that have four or five floors, and a few that have still more. In the strictly urban sections there are no gardens, with the exception of those of six houses in Koombarwara, and the streets are narrow, both in an absolute sense and relatively to the height of the houses.

46. In estimating the height of the front walls of the houses from the ground, if the legal minimum of two feet be allowed for the plinth and eight and a-half feet as the mean height of each floor, the mean height of the walls of the houses is about twenty-three feet. In some houses of the very poor, the rooms may be lower than what has been here assumed, while in the houses of the more substantial, each floor is nine and a-half or ten feet high. The mean width of the streets is twenty-six and a-half feet, or but little greater in measurement than the height of the walls of the houses. The streets and lanes differ much in width, the range being from six to forty-nine feet: the differences in the various sub-sections are here given.

	Mean Width of Streets.	Mean Estimated Height of side walls of Houses

Bhooleshwur	26.6	23.3
Kharatulao	27.7.....	19.8
Koombarwara		16.9

47. There were reported to be 3.97, or nearly four families to each house, and if the inhabited outhouses be taken into account, there were 30.6 persons to each house, and 18.3 to each floor. The distribution is arranged in appended Table **E**.

A table of the number of houses assessed and their value is also appended, **F**.

48. **Occupations.**—In most of the occupations, it is practically impossible to separate the persons engaged solely in them from those of their families who give occasional aid, and it is considered better to continue the arrangement that is observed in the Mortuary Registration, and

which shows, not the hands actually employed in the various occupations, but the numbers fed by the profits derived from them.

49. The occupations bringing a livelihood to the people are tabulated under seventy-seven heads. In a few the information is not so precise as was desired, owing to misapprehension on the part of the Enumerators; for instance, along with Military men all Government pensioners were included, instead of Military pensioners only; and with Plumbers, the Water and Gas-pipe layers have been mixed.

50. The occupations may be grouped and shown in the millesimal proportions they bear to the population as follows:—

Those connected with—

I.—Food and Condiments.

Baker	3·7	Grocer	11·7
Butcher	3·6	Poulterer	4·0
Cook	12·9	Purveyor	5·1
Confectioner	3·8	Salt Maker, Vendor	1·6
Fisherman	13·8	Tavern, Hotel-keeper	2·4
Grain Dealer	7·0	Water Carrier	7·9

	52·2

51. It is supposed that at one time caste determined the occupation that a Hindoo was to follow. Now it has but a limited influence, and there are few castes of which the members will not engage in any occupation, and but few occupations in which persons of any caste will not seek a livelihood; the enumeration Abstract Table shows this.

52. The Brahmun Caste is the one above all others in which strictness of rule is most likely to be observed, and it may very well be taken as an index of how much the Institutes of Menu and tradition are followed. Of the seventy-six occupations in the table, there are but eighteen in which Brahmuns were not found engaged; and of these there are five at least in which it is only a fortuitous occurrence that they were not so; such are those of Civil Engineer, Photographer, Grainparcher, Dyer, Umbrella-dealer. The occupations in which they will not engage, are the supply of animal food, working in leather, basket-making, scavenging, and washing clothes. Of the 80,604 Brahmuns enumerated in Bombay, there were returned as Beggars and Paupers 10,370. or one-third of the whole, as Writers and Accountants 5,973, Priests 2,606, Schoolmasters and Teachers only 720, Merchants and Bankers 1,728, Domestic servants 1,795.

53. The 8,021 Jain gave 2,064 or a fourth as labourers, and 1,839 as Merchants. The 1,598 Lingaet returned 266 as labourers, the rest were found in smaller numbers following most of the other occupations. The 21,771 Bhatia had as Merchants and Bankers 5,552, or one-fourth of the whole; as Dealers or Workers in iron 2,389; Writers and Accountants 1,805; Domestic servants 1,799; Clothiers and Drapers 1,614; Cotton-workers or Retailers 1,232. They and the Lingaet refuse some of the same occupations that are objected to by the Brahmuns.

54. Hindoos of Other Castes belonged to every occupation in the table, excepting that of Leechman, Priest, and Civil Engineer; and of those three, the application and breeding of leeches is alone objected to, that occupation being followed by Hindoos out-of-caste and Moosulmans. In the tabulation the designation *priest* has been taken in a too restricted sense, and those not Brahmuns who acted as priests in the lower castes, have been included with teachers. Of the 491,540 of these Hindoos of Caste, there were 153,386, or nearly a third who obtained a livelihood by labour; employed as domestic servants there were 27,232, as merchants 13,241, masons and quarry men 12,430, connected with cattle 12,289, cultivators and gardeners 11,371, gold and silver-smiths 10,670, occupied with horses 10,675, workers or dealers in iron 10,162, beggars and vagrants 6,917, or little more than one per cent., and 6,387 were independent.

55. Of the 32,434 Hindoo Out-caste, there were 12,410 Labourers, 4,938 workers in leather, 2,686 domestic servants, and 1,260 or nearly four per cent. beggars. Of the 145,880 Moosulmans there were occupied as labourers 18,129, or one-eighth; as maritime men 13,987, or nearly a tenth; domestic servants 9,968, beggars 8,055, or five and a-half per cent., and independent 4,322. There is not an occupation in the table in which the Moosulman was not found engaged. Of the 2,074 Negro-Africans a large proportion was maritime. The 49,201 Parsees had 7,180, or about a seventh, employed as writers and accountants, 6,149 as merchants and bankers, 5,906 workers or dealers in wood, 5,332 as domestic servants, 3,580 as Priests, 3,117 were independent, and, to their great praise, not one beggar. The 2,872 Jews also had no beggars in their community, their chief occupations were working in wood and domestic service. The 19,903 Native Christians had of their number 3,026 cooks and 2,504 domestic servants. The 1,891 Indo-Europeans had engaged as domestic servants 221, as merchants 212, clothiers and drapers 210. Of the 8,415 Europeans,

2,906; were maritime men, and 1,258 were Military men, or pensioners. Of the 358 Chinese 62 were maritime men.

Tables **G** and **H** in the Appendix show the number of assessed conveyances, and the number of licensed liquor shops in the island.

56. **Harbour.**—There were 32,582 persons enumerated on board the ships and boats in the Harbour, but that number does not include the whole maritime population, as many sailors and boatmen slept on shore. The total number of maritime men with their wives and children returned at the Census was 40,584, and to this has to be added part of the 11,252 classed under “fisherman and fishmonger.” The bulk of the harbour population was composed of Hindoos and Moosulmans, there being 53·6 per cent. of the former, and 34·5 of the latter; the Europeans were the only other race present that followed a seafaring life in any considerable number, and they were 8 per cent. of the whole.

57. From the Master Attendant’s Office it is learnt that the vessels registered as belonging to Bombay on 31st December 1863 were—

	Number of Vessels.	Aggregate Tonnage.	Aggregate of Crews.
Square-rigged vessels, under Merchant Shipping Act of 1854-55.....	103	57,398	3,686
Square-rigged vessels and country craft under Act X. of 1841	140	19,934	4,055
Boats of above ten tons	3,153
Boats of under ten tons	1,823
Canoes or Samboos.....	1,812

A statement of the shipping arrivals and departures during a year (1862-63) is given in the Appendix Table **J**.

58. **Birthplaces** have been noted according to the Collectorates or the Native States comprehended in the Bombay Presidency, and in the case of those from beyond the Presidency limits, the locality has been less minutely indicated.

59. The population of Bombay is mostly made up of immigrants, there being but 174,039, that is two hundred and thirteen in every thousand, or little more than a fifth part that was born in the island. There

were 728,357 of the people, or 891·2 in every thousand born within the circuit of the Bombay Presidency; and of these there were 591,962 or 749·4 in the thousand born in British territory, and 136,395 in territory not British.

60. The Muratha-speaking Coast Collectorates of Tanna, or the Konkun and Rutnagherry were the birth places of 180,601, or 221·2 in a thousand. The Canarese-speaking Canara, Dharwar, and Belgaum Collectorates gave 13,425 persons, or 16·5 *per mil.*, to the population. The Muratha-speaking Collectorates of Sholapoor, Satara, Poona, Ahmednuggur, and Nasik gave 141,795, or 173·7 *per mil.* and Kandeish 8,975, or nearly eleven in a thousand. The Goozurathē-speaking collectorates of Surat, Brouch, Kaira, and Ahmedabad were the birthplaces of 66,601; and 6,526 were born in Sind.

61. The territories not British, which were noted as birthplaces of the Bombay community, were the Murathee-speaking Malwan, which gave 29,061 persons, and the Portuguese dependencies, Goa, Demaun, and Diu, from whence came 14,199. In the Dukhun the Muratha-speaking Kolhapoor gave 7,311, and there were 6,868 numbered as having been born in Malwa and Rajpootana. From the Baroda territory and the smaller states in Goozerat there were 14,809; from Katiwar 21,393; and from Kutch there came 42,754 of the enumerated population of Bombay.

62. From Bengal, Oudh, Hindostan, and the Punjab there were 24,165 immigrants, or 29·4 in every thousand; and from territories comprised within the Madras Presidency limits there were 13,467, or 16·5 in a thousand. There were 30,467 from the Dukhunee Hyderabad province.

63. The total number of those born in Indian territory amounted to 796,366, or 975·3 in every thousand. Of the rest of the people 2,022 were from Burmah, Singapoor, Manila, and China; 30,379 were from Cashmere, Afghanistan, and Beloochistan; from Persia there were 1,639, and from Arabia 6,041 persons. Africa was stated to have been the birth-place of 1,441; America of 86; and Europe of 5,124, or 6·3 in every thousand.

64. **Insane.**—From the information in the Returns, there were present in Bombay 117 insane persons, exclusive of the 194 patients in the Lunatic Asylum. The total number was thus 311, but some of the patients in the Asylum having been brought from places beyond the island, on account of their malady, the proportion of insanes furnished by the population of Bombay cannot be estimated from the present data.

65. **Dumb.**—There were 96 persons reported as dumb, and of them there were forty-two Hindoos of caste, and six Out-caste, twenty-eight Moosulmans, and twenty Parsees. The proportion was one to every 8,505 of the total enumerated population. In Norway there was one in 1,200, in Prussia one in 1,334, in England one in 1,640, in France one in 1,671, in Bavaria one in 1,774, and in Holland one in 2,714 persons.

66. **The Blind** were stated to be 543 in number, and to be distributed, among the various races, nearly in the ratio observed in the total population. There was one blind to every 1,503 persons, while in the United Kingdom at last Census there was one to every 994 of the inhabitants. From the Returns of other European countries, it is found that in Norway there was one blind to every 540 persons; in France one to every 938; in Holland one to 1,663; in Prussia one to 1,738; in Bavaria one to 1,986. In the United States of America there was one blind person to every 2,470 of the people. The Bombay number of blind probably gives a low ratio, because from street-begging being discouraged, it is not likely that the blind would leave their homes in their actual proportion, to come with other immigrants to Bombay.

67. **The Lame** in the various races were 475.

68. It was reported that there were two hundred and sixty mutilated males, of whom two hundred and five were Moosulmans, and fifty-five were Hindoos. It may be that many of these Moosulmans were thus dealt with before being brought to Bombay, but there is no room to doubt that this inhuman mutilation has, in the instance of the Hindoos, taken place where British rule or influence might be exercised, so as to deter from this crime and the iniquities connected with it.

A. H. LEITH.

September 5th, 1864.

APPENDIX A.

LETTER

No.

HOUSEHOLDER'S RETURN

FOR

CENSUS OF 2ND FEBRUARY 1864.

Division

Section

Street or Waree....

No. of House.....

The House bearing above Number is Tiled.

Thatched.

The House has floors (including ground-floor)

No.

Is occupied by families receiving Census papers.

No.

Has no garden.

Has no inhabited out-houses.

Enumerator's signature.

This page to be filled in and signed by the Enumerator after
delivering the paper to the Householder.

LIST of the MEMBERS of this FAMILY, of VISITORS, SERVANTS, and Female, who abode in this Tenement or its premises on the night of Monday,

	NAME OR RELATIONSHIP.	SEX.	AGE, AS NEAR AS KNOWN.
	2	3	4
	Enter first the present head of the family by name and then the other Members of the family, each on a separate line; the males by name, but the females may be entered merely as Mother, Wife, Sister, Aunt, Niece, &c. and unnamed infants as Son or Daughter of the head of the Family, or as the case may be. In like manner enter the names or relationship of visitors, servants, and others, and their families.	Opposite each individual write Male or Female , as the case may be.	For infants under one month write the age in days. Under two years give the age in months. Above two years give age last birthday in years without fractions.

Appendix K.

No. 402.

HOME DEPARTMENT.

From the SECRETARY TO THE GOVERNMENT OF INDIA,
with the Governor General,

To the SECRETARY TO GOVERNMENT,
Legislative Department, Bombay.

Dated Simla, the 28th August 1863.

SIR,—I am directed by the Viceroy and Governor General to acknowledge the receipt of Mr. West's letter No. 44, dated the 8th April last, transmitting for the assent of His Excellency an authentic copy of a Bill for taking a Census of the Bombay Presidency, passed at a Meeting of the Council of the Governor of Bombay on the 2nd of April of this year.

2. In considering this Bill the Governor General has adverted to the correspondence on the subject to which it relates, which took place between the Governor General in Council and the Secretary of State in 1859, in which the former, writing on the 6th of April, states "that it would not be prudent to undertake a general enumeration of the people so soon after the violent disturbances by which a great portion of India has recently been agitated, and from which it is not even yet in all parts quite free. The preliminary measures necessary for a general Census would tend to keep alive the suspicions with which every act of the Government is now likely to be viewed, and it would be difficult, if not impossible, to persuade the people, or even those of education and intelligence among them, that the Census was not connected with some design to punish them for late offences, or to increase in some way their fiscal burdens—a view of the case which evil-disposed persons would not fail carefully to disseminate.

"These observations apply more particularly to the whole of the N. W. Presidency and Oudh, and to parts of the Lower Presidency and of Bombay; but they are not inapplicable anywhere; and as a partial Census of the population in some parts of India would be comparatively of small value, we recommend that the undertaking be postponed."

And the latter, in replying under date October 14th, expresses his "full and entire concurrence in the view therein taken," adding that "many years will probably elapse before it may be wise and prudent to engage in a general Census."

3. In the absence of any proof that the objections to taking a Census of the population of Bombay, stated in the correspondence which I have quoted, had received

due attention, His Excellency has felt some difficulty in determining the course which it would be his duty to take in dealing with the Bill which you have submitted. But His Excellency has finally resolved to give his assent to it, on the ground that it merely confers on the Governor of Bombay in Council a power to be used at his discretion and in his executive capacity, and with confidence that this power will not be exercised until the Governor of Bombay in Council is satisfied that no ground exists for the apprehensions and objections expressed by the Secretary of State and the Governor General in Council in 1859.

I have the honour to be, &c.

H. M. DURAND,
Secretary to the Government of India,
with the Governor General.

No. 120 OF 1863.

LEGISLATIVE DEPARTMENT.

From the UNDER-SECRETARY TO THE GOVERNMENT OF BOMBAY,

To the SECRETARY TO THE GOVERNMENT OF INDIA, CALCUTTA.

SIR,—I am directed by the Honorable the Governor in Council to acknowledge the receipt of your letter No. 402, dated the 20th ultimo, relating to the subject noted in the margin.

2. In reply, I am desired to state, for the information of His Excellency the Right Honorable the Governor General in Council, that, in the opinion of this Government, there does not exist in this Presidency, and at the present time, any ground for apprehensions such as were, no doubt, most justly entertained in the year 1859, with respect to such measures as that contemplated in the Bill that was passed by the Council of the Governor of Bombay on the 2nd April last. No such apprehensions appeared to be entertained by the Native members of the Council who were parties to passing the Bill, or by the Association for the protection of the interests of Natives in Bombay, which was consulted as to its provisions before the measure was passed.

3. I am further desired to convey the assurance of His Excellency in Council that the utmost care and circumspection will be observed by this Government in using the powers conferred by the Bill.

I have the honour to be, &c.

H. BIRDWOOD,
Under-Secretary to Government.

Poona, 25th September 1863.

HOME DEPARTMENT—LEGISLATIVE.

No. 5683.

From E. C. BAYLEY, Esq.,
Secretary to the Government of India,

To R. WEST, Esq.,
Officiating Under-Secretary to the Government of Bombay.

Dated Fort William, the 8th September 1863.

SIR,—In continuation of letter No. 402, dated the 28th August, from the Secretary with the Governor General, I have the honour to return, with the assent of the Governor General signified thereon, the authentic copy of the Law received with your letter No. 44, dated the 8th April.

I have the honour to be, &c.

E. C. BAYLEY,

Secretary to the Government of India.

INDIA OFFICE,

London, 9th December 1863.

LEGISLATIVE.

No. 52.

TO HIS EXCELLENCY THE RIGHT HONORABLE THE
GOVERNOR GENERAL OF INDIA IN COUNCIL.

MY LORD,—I have to acknowledge the receipt of your Lordship's Despatch, "Bill for taking a Census of the Bombay Presidency," dated 28th August (No. 32) 1863, transmitting a copy of the Act noted in the margin, which has been passed by the Council of the Governor of Bombay, and to which your Lordship has signified your assent.

2. In assenting to this Law, your Lordship very properly brought to the notice of the Government of Bombay the correspondence between the Governor General in Council and the Secretary of State in 1859 on the subject of undertaking a general Census of the population in India. I am of opinion, however, that such a Census should be undertaken under the sanction of the Governor General in Council only, in the exercise of powers to that effect conferred upon him by an Act of the Central Legislature, and that the Act passed by the Council of the Governor of Bombay should be disallowed.

3. I have now to inform you that the Act has been disallowed by Her Majesty, under the provisions of the 41st Section of 24 and 25 Vic. (Chap. 67), and to request that you will notify the same to the Governor in Council, Bombay.

4. Your Lordship in Council is requested to consider whether it would be expedient to pass a law of the Council of the Governor General for taking a general Census of the population of India.

I have the honour to be, &c.

C. WOOD.

[20]

No. 551.

Copy forwarded to the Government of Bombay with reference to correspondence ending with letter to that Government No. 5683, dated 8th September 1863.

By order,

J. W. S. WYLLIE,

Under-Secretary to the Government of India.

*Fort William, Home Department, Legislative,
the 25th January 1864.*

HOME DEPARTMENT—LEGISLATIVE.

No. 1013.

From J. W. S. WYLLIE, Esq.,

Under-Secretary to the Government of India,

To the SECRETARY to the GOVERNMENT of BOMBAY.

Dated Fort William, the 11th February 1864.

SIR,—In continuation of my docket No. 551, dated the 25th ultimo, I am directed No. 1, dated the 11th February 1864. to forward for the information of the Government of Bombay the accompanying copy of a Despatch which has been addressed to the Secretary of State by the Governor General in Council.

I have the honour to be, &c.

J. W. S. WYLLIE,

Under-Secretary to the Government of India.

HOME DEPARTMENT—LEGISLATIVE.

No. 1 of 1864.

To the RIGHT HONORABLE SIR CHARLES WOOD, *Baronet, G. C. B.*,
Secretary of State for India.

SIR,—We have the honour to acknowledge the receipt of your Despatch No. 52, dated the 9th December last, in the Legislative Department, informing us of the disallowance by Her Majesty of the Bill for taking a Census of the Bombay Presidency.

2. In accordance with the instructions contained in the closing paragraph of your Despatch, we have considered the expediency of enacting a Law for taking a general Census of the population of India.

3. We believe that the objections to this course, stated in our letter in the Statistical Department, No. 1, dated the 6th April 1859, have not yet lost their force, and we are of opinion that any such measure would be at the present time very impolitic, and on other grounds undesirable.

4. These objections, however, do not seem to us to apply to a Census for Municipal purposes of the Presidency Towns, such as is contemplated by Sections 101 to 108 of the Local Bengal Act No. VI. of 1863.

5. Your despatch No. 46, dated the 24th August last, has informed us that this last mentioned Act will be left to its operation. We accordingly presume that you concur in the view above expressed, and that you will not object to the introduction of a similar measure into the Council of the Governor of Bombay, should the Bombay Government desire it.

We have the honour to be, &c.

JOHN LAWRENCE.

R. NAPIER.

H. B. HARRINGTON.

H. S. MAINE.

C. E. TREVELYAN.

W. GREY.

Fort William, the 11th February 1864.

BOUNDARIES

OF THE

REGISTRATION DIVISIONS, SECTIONS, AND SUB-SECTIONS.

The united Islands of Bombay and Colaba are parted, for Police and Registration purposes, into six *Divisions*, which are distinguished severally by the six first letters of the Alphabet; and the Harbour forms a seventh, called the *Water Division*.

The six lettered Divisions into which the land is divided, are subdivided into *Sections*, or Districts, each of which is both named and numbered. Some of the Sections are divided into Sub-sections which are named. There is no sub-division of the *Water Division*.

A DIVISION includes Colaba and that part of the Island of Bombay lying South of *Esplanade Cross-Road* and *First Marine Lane*; the former of which roads separates it from Division **B**; and the latter separates it from Division **C**.

SECTION 1st.—**COLABA**—formerly two Islands, is still nearly surrounded by sea. On the North, it is connected with Bombay by the *Colaba Vallade* or Causeway, and land recently recovered from the Sea, and across these runs the boundary line which separates it from the *Esplanade*, or Section 2nd of Division **A**.

SECTION 2nd.—**FORT**—is bounded on the East by the Harbour, and elsewhere by the remains of the Ramparts and Ditch (now being removed), which separate it from the *Esplanade*, or Section 2nd of Division **A**.

SUB-SECTIONS. } **FORT, SOUTH,** } are separated by Church-gate Street, the north
 { **FORT, NORTH,** } side of Elphinstone Circle, the boundary
 between the Town Hall and the Mint and the Castle Wall at the Flag Staff
 bastion.

SECTION 3rd.—**ESPLANADE**—is bounded on the South by the *Colaba Vallade* and recovered land, which separate it from *Colaba*, or Section 1st of Division **A**; on the East by the Harbour and Fort Ditch, which latter separates it from the *Fort*, or Section 2nd of Division **A**; on the North by *Esplanade Cross-Road* and *First Marine Lane*, the former of which separates it from *Market*, or Section 1st of Division **B**, and *Mandwee*, or Section 2nd of Division **B**; the latter separates it from *Dhobee-tuluo*, or Section 1st of Division **C**; on the West by the Sea of Backbay.

B DIVISION is bounded on the South by *Esplanade Cross-Road*, which separates it from Division **A**; on the East by the Harbour; on the North by *Walpukadee Road*, and *Baboola Tank Road*, which roads separate it from Division **E**; on the West by *Kulhadavee Road*, *Mombadecree Road*, and *Windee Bazar Street*, which separate it from Division **C**.

SECTION 1st.—**MARKET**—is, of triangular shape, with the apex to North. It is bounded on the South by part of *Esplanade Cross-Road*, which separates it from *Esplanade*, Section 3rd of Division **A**; on the East and North-East by *Sheik Ibrahim Soobedar Street* (Rungaree Maola), *Syud Abdool Ruhmun Street*, part of *Musjred Bundur Street*, and *Mombadevee Street*, which separate it from *Mandwee*, Section 2nd of Division **B**; on the West and North-West by *Kalbadevee Road* and *Mombadevee Road*, which separate it from *Dhobee-tulao*, Section 1st of Division **C**.

SECTION 2nd.—**MANDWEE**—is bounded on the South by part of *Esplanade Cross-Road*, which separates it from *Esplanade*, Section 3rd of Division **A**; on the East by the Harbour; on the North by *Mombadevee Road*, also by *Cross-Road* and *Cobard Bowla Street*, the first of which separates it from *Bhooleshwur*, Section 2nd of Division **C**, and the other two separate it from *Oomburkharee*, Section 3rd of Division **B**; on the West by *Sheik Ibrahim Soobedar Street* (Rungaree Maola), *Syud Abdool Ruhmun Street*, portion of *Musjid Bundur Street*, and *Mombadevee Street*, all which separate it from *Market*, or Section 1st of Division **B**.

SUB-SECTIONS. { **MANDWEE**, } are separated by *Old Bungalpoora Street*, *Sheikh*
 { **CHUKLA**, } *Ali Ruhmun Street*, part of *Warachee Gadee*,
Dongree, *Joao Souza Street* and *Don Tar 3rd Row*.

SECTION 3rd.—**OOMBURKHAREE**—is bounded on the South by *Cross-Road* and *Cobard Bowla Street*, which separate it from *Mandwee*, Section 2nd of Division **B**; on the East by the Harbour; on the North by *Walpakadee Road* and *Baboola Tank Road*, both which separate it from *Turwaree*, Section 2nd of Division **E**; on the West by *Bindee Bazar Road*, which separates it from *Bhooleshwur*, Section 2nd of Division **C**, and *Khara-tulao*, Section 3rd of Division **C**.

SUB-SECTIONS. { **OOMBURKHAREE**, } are separated by *Kobud Barul Row*,
 { **DONGREE**, } *Neeshandar Neecha Para*, *Oomburkharee*
Row, *Jail 2nd Road* and *Baboola Tank Lane*.

C DIVISION is bounded on the South by *First Marine Lane*, which separates it from Division **A**; on the East by *Kalbadevee Road*, *Mombadevee* and *Bindee Bazar Roads*, all which roads separate it from Division **B**; on the North by *Obelisk Road* and *Grant Road*, which separate it from Division **E**; on the West by the Sea at Backbay, also by *Chundunee Road*, *Girgaon Portuguese Church Lane*, part of *Girgaon Back Road*, and *Gaondevee Road*, which roads separate it from Division **D**.

SECTION 1st.—**DHOBEE-TULAO**—is bounded on the South by *First Marine Lane*, which separates it from *Esplanade*, Section 3rd of Division **A**; on the East by *Kalbadevee Road*, which separates it from *Market*, Section 1st of Division **B**; on the North by *Agiaree Lane*, *Portuguese Church Lane*, and *Thakoorwaree Lane*, the first of which separates it from *Bhool-shwur*, Section 2nd of Division **C**, the last separates it from *Girgaon*, Section 4th of Division **C**; on the West by the Sea at Backbay.

SUB-SECTIONS. { **Dhobee-tulao**, } are separated by *Old Sonapoor Street*, part of
 { **Phunuswaree**, } *Breech Candy Road* and *Parsee Agiaree Lane*.

SECTION 2nd.—**BHOOLESHWUR**—is bounded on the South by *Agiarce Lane*, which separates it from *Dhobee-tulao*, Section 1st of Division **C**; on the East by *Kalhadevee Street*, *Mombadevee Row*, part of *Bindee Bazar Road*: the first two separate it from *Mandwee*, Section 2nd of Division **B**, the last separates it from *Oomburkharee*, Section 3rd of Division **B**; on the North by *Erskine Road*, *Cawasjee Patel Tank Road*, which separate it from *Khara-tulao*, Section 3rd of Division **C**; on the West by *Portuguese Church Street*, which separates it from *Girgaon*, Section 4th of Division **C**.

SECTION 3rd.—**KHARA-TULAO**—is bounded on the South by *Erskine Road*, *Cawasjee Patel Tank*, and part of *Girgaon Back Road*, which separate it, the former, from *Bhooleshwur*, Section 2nd of Division **C**, the last from *Girgaon*, Section 4th of Division **C**; on the East by part of *Bindee Bazar Road*, which separates it from *Oomburkharee*, Section 3rd of Division **B**; on the North by *Obelisk Road* and part of *Grant Road*, which separate it from *Kamatheepoor*, Section 3rd of Division **E**; on the West by *Trimbuk Purshotum Street*, which separates it from *Girgaon*, Section 4th of Division **C**.

SUB-SECTIONS. { **KHARA-TULAO**,
 { **KOOMBARWARA**, } are separated by *Duncan Road*.

SECTION 4th.—**GIRGAON**—is bounded on the South by *Tahakor-warce Lane*, which separates it from *Dhobee-tulao*, Section 1st of Division **C**; on the East by *Ardesir Dady Street* and *Trimbuk Purshotum Street*, the former of which separates it from *Bhooleshwur*, Section 2nd of Division **C**, the latter separates it from *Khara-tulao*, Section 3rd of Division **C**; on the North by part of *Grant Road*, which separates it from *Kamatheepoor*, Section 3rd of Division **E**; on the West and South-West by *Backbay*, *Chundunee Road*, *Girgaon Portuguese Church Lane*, *Girgaon Back Road*, and *Gaondevee Road*, which roads separate it from *Chaoputee*, Section 1st of Division **D**.

SUB-SECTIONS. { **GIRGAON**,
 { **KHETWADEE**, } are separated by *Girgaon Back Road*.

D DIVISION includes all between *Malabar Point* and the middle of *Hornby Vallade*, it has the sea on its South, West, and North, and is bounded on the East first by *Chundunee Road*, *Girgaon Portuguese Church Lane*, and *Girgaon Back Road*, which separate it from Division **C**; and then by a line along *Tardeo Road*, as far as *Bellasis Road*, and from thence Northward by the Main Drain, which line separates it from Division **E**.

SECTION 1st.—**CHAOPUTEE**—is bounded on the South by Sea of Backbay; on the East by *Chundunee Road*, and *Girgaon Portuguese Church Lane*, which separate it from *Girgaon*, Section 4th of Division **C**; on the North by part of *Girgaon Back Road*, which separates it from *Girgaon*, Section 4th of Division **C**; on the West by *Gaondevee Road*, which separates it from *Walkeshwur*, Section 2nd of Division **D**.

SECTION 2nd.—**WALKESHWUR**—is bounded on the South by the Sea; on the East by Sea and *Gaondevee Road*, which latter separates it from *Chaoputee*, Section 1st of Division **D**; on the North by *Gaola-tulao Road*, which separates it from *Mahalaxmee*, Section 3rd of Division **D**; on the West by Sea.

SECTION 3rd.—**MAHALUXMEE**—is bounded on the South by *Gaola Tank Road*, which separates it from *Walkeshwur*, Section 2nd of Division **D**; on the East by *Tardeo Road* Northward, as far as *Bellasis Road*, and thence further Northward by the Main Drain, which separate it from *Kamatheepoora*, Section 3rd of Division **E**; on the North by Sea and the boundary line of division running Northward from middle of *Hornby Vallade*, which separate it from *Wurlee*, Section 3rd of Division **F**; on the West by Sea.

E DIVISION is bounded on the South by *Walpakadee Lane*, *Baboola Tank Road*, and by *Obelisk* and *Grant Roads*. The two first separate it from Division **B**, the two last separate it from Division **C**; on the East by the Harbour; on the North by a line drawn from the middle of *Hornby Vallade* to *Bhocewaree*, North of Parel Tank, and onwards to the Harbour, which line separates it from Division **F**; on the West by part of *Tardeo Road*, and from *Bellasis Road* Northward by the Main Drain, which separate it from Division **D**.

SECTION 1st.—**MAZAGAON**—is bounded on the South by *Walpakadee Lane*, which separates it from *Oomburkharee*, Section 3rd of Division **B**; on the East by the Harbour; on the North by line along Northern boundary of *Powder Works* to *The Mount*, which line separates it from *Seoree*, Section 5th of Division **E**; on the West by *Mount Lane*, which separates it from *Tarwaree*, Section 2nd of Division **E**.

SECTION 2nd.—**TARWAREE**—is bounded on the South by *Baboola Tank Road*, which separates it from *Oomburkharee*, Section 3rd of Division **B**; on the East by *Mount Lane*, which separates it from *Mazagaon*, Section 1st of Division **E**; on the North by *Mount Road*, which separates it from *Parel*, Section 4th of Division **E**; on the West by part of *Parel Road*, which separates it from *Kamatheepoora*, Section 3rd of Division **E**.

SECTION 3rd.—**KAMATHEEPOORA**—is bounded on the South by *Grant* and *Obelisk Roads*, the former separating from it *Girgaon*, Section 4th of Division **C**, the latter separating it from *Khara-tulao*, Section 3rd of Division **C**; on the East by the *Parel Road*, which separates it from *Tarwaree*, Section 2nd of Division **E**; on the North by line drawn from West end of *Mount Road*, which line separates it from *Parel*, Section 4th of Division **F**; on the West by South part of *Tardeo Road*, and North part of Main Drain, which separate it from *Mahaluxmee*, Section 3rd of Division **D**.

SECTION 4th.—**PAREL**—is bounded on the South by *Mount Road*, and a line from thence drawn Westward, which road separates it from *Tarwaree*, Section 2nd of Division **F**, and which line separates it from *Kamatheepoora*, Section 3rd of Division **E**; on the East by *Gorupdevee Road* and *Parel Tank*, which separate it from *Seoree*, Section 5th of Division **F**; on the North by line from *Bhocewaree*, North of Parel Tank, to *Parel Road*, which line separates it from *Seo*, Section 1st of Division **F**; on the West by North part of Main Drain and line drawn from middle of *Hornby Vallade* to *Parel*, the part of the Drain separating it from *Mahaluxmee*, Section 3rd of Division **D**, and the line mentioned, separating it from *Wurlee*, Section 3rd of Division **F**.

SECTION 5th.—**SEOREE**—is bounded on the South by a line along North boundary of *Powder Works* to *The Mount*, which line separates it from

Mazagaon, Section 1st of Division **F**; on the East by the Harbour; on the North by line from *Bhoewaree* to north of *Seoree Fort*, which line separates it from *Seo*, Section 1st of Division **F**; on the West by *Gorupdevee Road* and road leading on to *Parel Tank*, which separate it from *Parel*, Section 4th of Division **E**.

F DIVISION includes all that part of the Island north of a line drawn from the middle of *Hornby Vallade* by *Parel*, *Bhoewaree*, north of *Seoree Fort* to the Harbour, which line separates it from the **D** and **E** Divisions.

SECTION 1st.—**SEO**—is bounded on the South by a line drawn from *Bhoewaree Road* to the Harbour, which line separates it from *Seoree*, Section 5th of Division **F**; on the East by the Sea; on the North by Sea and Causeway, which separate it from Island of Salsette; on the West by *Parel Road*, and a line northward, along the Drain to *Dharavee*, which separate it from *Mahim*, Section 2nd of Division **F**.

SECTION 2nd.—**MAHIM**—is bounded on the South by a line from *Parel* to *Wurlee Sluice*, which line separates it from *Wurlee*, Section 3rd of Division **F**; on the East by *Parel Road* and Drain running northward to *Dharavee*, which separate it from *Seo*, Section 1st of Division **F**; on the North by Sea, which separates it from *Salsette*; on the West by the Sea.

SECTION 3rd.—**WURLEE**—is bounded on the South and East by a line from middle of *Hornby Vallade*, which line separates it from *Mahaluzmee*, Section 3rd of Division **D**, and from *Parel*, Section 4th of Division **F**; on the North by a line from *Parel* to *Wurlee Sluice*, which line separates it from *Mahim*, Section 2nd of Division **F**; on the West by the Sea.

WATER DIVISION includes all the Shipping in the Harbour.
